It is catering to the needs of more than 4663 students.

GENESIS

The access to digital information is an event marked by the connectivity and technology and the relation of both with the user. For this transformation to take place is necessary a clear vision in what doors must be knocked in this digital era. This factor will determine the success or failure of the information professionals. Information access and use can only flourish in a society that appreciates the need for it and where government recognizes that information is the key to national growth and prosperity. Information seekers and users may not know about the resources available. The role of libraries has not always been made clear to information seekers, particularly in developing countries. The explosion of information is obviously a challenge to libraries. Recognizing its importance, information is increasingly sought in an increasing number of situations by an increasing number of people. This has increased the volume of available information. The advancement of knowledge is made possible by research by scholars in all fields. Coupled with this is the fusion and fragmentation of disciplines and knowledge. As these break down into smaller segments, the scholarly literature becomes more specialized. In addition, there are thousands of other information packages, e.g., journals, magazines, and newspapers, being turned out by an ever-expanding publishing industry. The electronic media also produce vast volumes of information. The growth of knowledge is related to the growing number, size, and diversity of information transfer packages such as books, journals, technical reports, etc. The main goal of this conference is closest look at information transformation – Two days conference is to exchange ideas and find out different ways to manage information contents and connect it to the world in more effective & efficient way. The International Conference will explore different modes of available connectivity, which brings in new Paradigm shifts in knowledge Innovation, Innovation Representation, Information Management Systems and Librarianship. The conference will provide an appropriate platform to all Academicians, Intellectuals, and researcher and, scientists for capturing & sharing expertise on: **Information Communication in Digital Era: Present Scenario and Future Perspectives**. It will provide a single platform for International experts to exchange experience, Knowledge, views and Skills, Research involves creativity and innovation while blending both art and science with precision. To become a competent researcher, understanding the nuances of the mechanisms for organized research with latest technology is a necessity. Develop an understanding of various aspects of information transformation.
