About the Conference

The aim of ICRAM-2018 is to provide a platform to the researchers from the different parts of the country to discuss recent advances in Mathematics. The conference will focus on the development of the new mathematical computational techniques along with their application. The main objective of the conference is to discuss many recent significant developments and to identify important problems and new research directions in different areas of Mathematics. It will bring close the senior and the young researchers working in different areas of Mathematics to exchange new ideas together.

Sub Themes

- Real Analysis/Topology/Functional Analysis
- Algebra and its Applications
- Convex Analysis and Optimization
- Discrete Mathematics
- Number Theory
- Generalized Derivations
- Mathematical Statistics
- Operation Research Techniques
- Fuzzy Mathematics
- Fluid Dynamics
- Enumerating Mathematics
- Differential Equation
- Differential Geometry
- Programming in C and Numerical Analysis
- SAR (Synthetic Aperture Radar) Image Modeling and Mathematically Analysis.
- Information Retrieval and Search Engines
