Besides, six add-on courses and two vocational courses sponsored by University Grants Commission are also run to equip students with market oriented innovative skills. (For more details visit www.aggarwalcollege.org)

About the Conference

The two day National Conference on entrepreneurship aims to bring together leading academics, corporate leaders, researchers and scholars from various institutions to exchange and share their experiences and knowledge on all aspects of entrepreneurship and its potential. The conference will provide a platform to discuss the present challenges encountered and solution adopted in the field of entrepreneurship. There will be invited talks by experts to make stakeholders aware of such issues that are essential for nurturing entrepreneurship. Through this conference stakeholders will understand that the promotion of entrepreneurship will go a long way in making India a vibrant, dynamic and self sustained economy.

Theme of the Conference

Entrepreneurship is about serendipity, a kind of passion and zeal to take up confidently ventures which others could not even visualize and the outcomes satisfy individuals' zest for achievements, recognition and self esteem culminating in the nation's welfare and prosperity. Schumpeter in his theory of profit opined that innovation is key to profit making and by innovation he meant creative destruction, providing innovative solutions required so urgently to myriad latent problems. As the population multiplies at faster rate, needs and desires increase manifold, an urgent need arises for incubating, promoting and sustaining entrepreneurship in all the sectors of the economy for a peaceful, prosperous and progressive nation. All wealthy nations could do that as they have had an array of entrepreneurs contributing in creation of new products and processes. India being on the cusp on an emergent economy require an eco system where youth are exposed to challenges to be dealt with generation and giving shape to new ideas for utilizing resources in innovative ways accompanied with higher productivity and job creation. The notion of hereditary entrepreneurship has lost its relevance. The successful saga and contributions of star organizations has proved that through acquiring high tech skills, knowledge and commitment entrepreneurship can be rewarding. The present conference is an endeavor to deliberate and analyze the pathways to promote and sustain entrepreneurship among youths of our country so that latent potential may be leveraged for economic progress and job creation: two major challenges to be dealt simultaneously. The onus lies on the government and the corporate that how to motivate and involve the youth in generating and implementing new ideas through crating an eco system for incubating entrepreneurship. The industry- academia cooperation and collaboration will help in fulfilling the vision of a new and resurgent India with greater participation of youth who should act as the agent of positive change in India's journey towards world leadership position.
